

ZEN AUTOMATION TECHNOLOGY PTY LTD

CNC MACHINE LOADING ROBOT

Robotic Solutions

Zen Automation is pleased to offer its latest development .

The CNC machine loading robot

Zen Automation has developed the first intelligent robot that makes it's own decisions. Using two unique vision systems mounted on the robot, the robot can scan and decide it's next move; allowing the robot to continually load a CNC machine for up to 35 hours without the need for an operator, over 3 shifts giving a labour saving of 3 persons or 35 hours a week off your operating costs. The system is a first for the Australian manufacturing market and Zen Automation are the leaders in cutting edge technology
