

# ROBOTIC TRAY PACKER

## Robotic Solutions

Zen Automation is pleased to offer its latest development .

## The Robotic Tray Packer

Due to the growing shortage of packing shed labour Zen Automation had developed a unique alternative solution using SCARA Robots. The single phase over conveyor mounted robot incorporates a vision system that can track the random fruit and place it in the correct orientation in the carton. Using vision, the system can also pack by size and grade allowing the robot to reject defective product. This low cost robot can also be inverted over the belt. It can also be easily moved from shed to shed to pack Mango, Avocado, Peaches, Nectarine etc.

Single Phase Power supply; Windows platform; User Friendly.

Simple Solutions Solving your Packing Problems.
