Zen Automation is pleased to offer its latest development .

The Robotic Bag Inserter

The robotic bag inserter allows the customer flexibility to change the bag length to suit, from a tube roll the bag feeding system delivers the pre-set length to a set of sealing jaws and a knife. The Robot grabs the bag using vacuum and unique flippers pulls the bag down over the carton. Zen Automation use a small single phase 6 axis robot for this function. Using a robot means Automation without over mechanised equipment. Bag sizes can easily be changed and the robot has the flexibility to quickly vary it's stroke.

Australian designed and Built by Zen
Automation Pty Ltd.
